Adaptable and reliable.

MELTON's MEB Gun Series Coating Applicator improves obsolete, previously existing roller systems with a new and advanced engineering technology that reduces costs and allows for easy configuration. For intermittent and several application widths, the MEB hot melt guns bring the most reliable solution for wood sealing and adhesive application.

MELTON's MEB Gun Series:

- Up to 90 mm of application coating width
- Suitable for a range of hot melt reactive adhesives such as PUR and EVA
- 100% easily configurable

Easy initial height adjustment

Module uses advanced telescopic technology for a precise cut off

Manual regulation for adjustment of the coating width, up to 90 mm

Dual orientation to ensure production versatility

100% compatible connectors

APPLICATION

For high quality adhesive applications and the sealing of wood edges, Melton's MEB Coating Gun Series brings the latest in technology by offering increased strength with a new spring system to resist high wood impact during the application process. The innovative design provides maximum flexibility in movement and resistance to deterioration from edgework.

A TOTAL PACKAGE

MELTON offers a complete selection of hot melt components and support equipment:

- RTD hot melt hoses**
- Manual and automatic dispensing valves**
- Nozzle and applicator styles**
- Mounting bracket packages**
- Solid state pattern control systems**
- In-line filters**
- Replacement parts for competitive systems**
- High performance hot melt adhesives**
- Cost-effective rebuild/exchange programs**

Technical Specifications

MEB Series Characteristics	
Operating Temperature	240 ° C / 464 ° F
Operating Hydraulic Pressure	100 bar/ 1450 psi
Operating Speed	150 cycles per minute
Operating Air Pressure	4 - 6 bar/ 58 - 87 psi
Electric Supply	190-250 VAC 50/600 Hz
Max. Application Width	90 mm

ISO 9001
